Chapter 9 Key Notes

Created by Justin Ramos

Shutter Speed

Definition:

The length of time the camera shutter is open; this determines the brightness of the resulting photo.

Image Sensor

Definition:

The surface inside a camera when the image is collected, upside down; but in digital cameras the sensor converts the light into an electric charge, which the camera's software reconstitutes as a photograph for display on the camera's screen.

Camera Obscura

Definition:

The forerunner of the modern camera, a dark room (or box) with a small hole in one side, through which an inverted image of the view outside is projected onto the opposite wall, screen or mirror, and then traced.
